

1. Data Exploration

- Summarizing numerical data (SUM, COUNT, AVERAGE)
- Identifying extremes (MIN, MAX)
- Understanding distributions and variability

Assessment Components:

- **Basic Calculations (2 marks)** → Correct SUM, COUNT, AVERAGE results
- **Min & Max Analysis (1 mark)** → Correct use of MIN and MAX

2. Logical Analysis

- Applying IF conditions to classify values
- Creating categorical groupings (e.g., price ranges, pass/fail)
- Building decision rules in spreadsheets

Assessment Component:

- **Logical Function (IF) (3 marks)** → Correct classification of price range

3. Conditional Aggregation

- Using SUMIF for conditional totals
- Using COUNTIF for conditional counts
- Combining multiple criteria for structured aggregation

Assessment Component:

- **Conditional Functions (3 marks)** → Correct SUMIF and COUNTIF formulas

4. Text Manipulation

- Extracting substrings with LEFT, RIGHT, MID
- Finding positions with FIND/SEARCH
- Cleaning and structuring text data for analysis

Assessment Component:

- **Text Functions (1 mark)** → Correct extraction using LEFT, RIGHT, MID

5. Spreadsheet Proficiency

- Organizing worksheets for clarity and efficiency
- Combining formulas into structured models
- Formatting and documenting analytical workflows
